PROFESSIONAL SUMMARY

Entry-level Frontend Developer with solid backend knowledge and hands-on experience building and deploying production-grade React, Node.js, and MongoDB applications. Delivered a microservices-based AI fake news detection platform and a full-stack CRUD note-taking app — both live on Vercel. Proficient in building responsive UIs with React and TailwindCSS, REST API integration, JWT authentication, and end-to-end deployment across Vercel and Render. Seeking a Frontend Developer role to contribute clean, scalable code from day one.

SKILLS

Languages	JavaScript (ES6+), HTML5, CSS3, ES2015+
Frontend	React.js, TailwindCSS, Bootstrap, Responsive Design, UI/UX Principles
Backend	Node.js, Express.js, REST APIs, JWT Authentication, Microservices , MVC Architecture
Databases	MongoDB, Mongoose, MySQL , CRUD Operations
Tools & Platforms	Git, GitHub, Vercel, Render, VS Code, Postman, UptimeRobot, npm
Currently Learning	TypeScript, Next.js

SELECTED PROJECTS

Verifeye — AI-Powered Fake News Detection System | *React.js, TailwindCSS, Node.js, Express, FastAPI, MongoDB, JWT* **2026**

Live: <https://verifeye-lac.vercel.app/>

- Architected and deployed a full-stack microservices platform across 3 independently hosted services (Vercel + Render), handling end-to-end ownership from database schema to production deployment.
- Built a React + TailwindCSS frontend with JWT-based authentication, protected routes, dark-themed UI with shimmer loading states, and fully responsive layouts across all screen sizes.
- Developed a FastAPI ML service integrating a TF-IDF vectorisation model to score article credibility in real time via REST API, returning confidence scores to the frontend.
- Resolved 10+ production-level bugs including auth redirect failures, cross-service environment variable misconfigurations, and CORS issues — maintaining 99%+ uptime using UptimeRobot keep-alive automation.
- Implemented end-to-end guest prediction flow allowing unauthenticated users to test core functionality, increasing accessibility without compromising authenticated user data.

NoteNest — Full-Stack Note-Taking Application | *React.js, Bootstrap, Node.js, Express.js, MongoDB*

2026

Live: <https://notenest-livid.vercel.app/>

- Delivered a complete full-stack CRUD application end-to-end — React frontend, Express REST API backend, and MongoDB persistence — enabling users to create, read, update, and delete notes with real-time UI updates.
- Designed and implemented 5 RESTful API endpoints with input validation, error handling, and structured JSON responses, integrated with MongoDB via Mongoose schemas.
- Built a responsive React frontend using Bootstrap with organised note management, clean component architecture, and state-driven UI — achieving consistent rendering across mobile and desktop.

EDUCATION

Indira Gandhi National Open University (IGNOU)

2023 – 2026

Bachelor of Computer Applications (BCA) · Delhi, India · Final Year

ACHIEVEMENTS & CERTIFICATIONS

Full-Stack Deployment: Independently deployed two production applications across Vercel, Render, and MongoDB Atlas — handling CI/CD, environment configuration, and uptime monitoring end-to-end.

WordPress Development Curriculum: Completed practical training in theme customisation, plugin integration, and CMS-based web development.

Frontend Development: Delivered Verifeye and NoteNest as fully live, publicly accessible applications demonstrating end-to-end React, Node.js, and MongoDB capability.

Community Presence: 500+ LinkedIn connections with active engagement in the frontend development and open-source community.
